DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. According to claims 1 and 2, the improvement is in the layer of tin oxide, therefore Examiner can not particularly point out how the invention's improvement comprises the layer of tin oxide wherein all the layers are of materials other than tin oxide.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 4. Claims 1-2 and 5 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Sun (6185241). Sun teaches a metal capped mirror **Fig. 1** comprising a stack of dielectric layer of alternating high and low indices of refraction capped with a layer of metal comprising a layer of tin oxide to which the metal capping layer is directly adhered, **column 1**, **line 55 through 3**, **line 23**.

Application/Control Number: 09/435,668

Art Unit: 2881

In regard to claims 2 and 5, Sun teaches all stated limitations, see column 2, line 60 through 3, line 23.

In regards to claim 4, Sun teaches all stated limitations, see column 3, lines 3-8.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 3, to the extent understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Sun. Sun, as applied above, teaches all stated limitations except that the stack layers are of a material other than tin oxide. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use various ohmic material known in the art, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cornelius H. Jackson whose telephone number is (703)306-5981. The examiner can normally be reached on 8:30 - 4:00, Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teresa M. Arroyo can be reached on (703)308-4782. The fax phone
